Deployment of Sustainable Aviation Fuels

Jonas Rorarius
Head of Supply Chain Compliance at Neste
Neste journey so far

Transformation from traditional refining into a business that is all about climate change

3rd most sustainable company in the world

Growth based on becoming world leader in renewables, low-carbon solutions, renewable chemicals, services and focus on customer value
2018
Neste in numbers

1,422 M€ operating profit of which 69% came from renewables

Share of waste and residue raw materials 83%

Renewable fuels cut global climate emissions by 7.9 MT*

*Carbon footprint of 1.2 million average EU citizens / 3 million cars removed from the roads for a year
World’s largest producer of Renewable Diesel
Production capacity of 2.7 million tons / 21.2 million barrels

- The Netherlands 1.2 MT
  - The world’s largest renewable diesel refinery

- Finland 0.4 MT
  - The world’s first renewable diesel refinery

- Singapore 1.1 MT
  - The world’s largest renewable diesel refinery
  - Additional production capacity in 2022

Neste Green Hub
Helps aviation stakeholders find the best possible solutions to decarbonize aviation

• Logistics
• Collection of local feedstocks
• Green Hub & funding solution design
• Sustainability services
• Renewable: Plastics -in-cabin and terminals, Packaging materials, Detergents, Transformer oils, De-icing fluids
Neste MY Renewable Jet Fuel™

High quality sustainable aviation fuel.

ISCC certified fuel made from 100% renewable raw materials

Up to 80% reduction in GHG emissions over the fuel’s lifecycle
## Neste cooperation with leading aviation brands

<table>
<thead>
<tr>
<th>Year</th>
<th>Collaboration Details</th>

Collaboration to support supply chain development.
Neste’s significant commitment to make aviation more sustainable

TODAY
Scaling up towards continuous production of Neste MY Renewable Jet Fuel™

BY 2022
Production increase to significant volumes to meet the demand

SINGAPORE
Neste’s 1.3 MT capacity growth for renewable products, among others renewable jet fuel

Total renewable product capacity 4.5 MT annually in 2022
We are on the journey to Decarbonize Aviation
