1. PANGASIIUS FISH OIL - GENERAL INFO

- About the fish: PAGASIIUS HYPOTHALMYOS is a freshwater fish that natively live in a tropical climate and prefer water with a 6.5-7.5 pH, a water hardness of 2.0-29.0 dGH, and a temperature range of 22-26 °C (72-79 °F). They prefer large bodies of water similar to the deep waters of their native Mekong river basin.

- They are mostly allocated in SOUTHEAST ASIA, especially VIETNAM - The biggest supplier of the panga-fish fillet in the word now.

- The fish are raised at farming area under mass scale.
- Total farming area in Vietnam: 5,000 hecta => 1,2 mil tons of fish in 2016.
