Shape the future as a member of the ISCC Association
ISCC is a global sustainability certification system

ISCC’s objectives:

- Supporting companies to achieve their sustainability targets and to implement the SDGs
- Contributing to the development of the circular economy and bioeconomy
- Verification of the implementation of social and ecological sustainability criteria
- Monitoring of deforestation-free supply chains
- Protection of high biodiverse and high carbon stock land
- Calculating and reducing GHG emissions
- Establishing traceability in global supply chains
- Allowing for credible and justified claims and logo use
Organisational set up of ISCC

- ISCC is a multi-stakeholder initiative
- The ISCC Association includes members from different stakeholder groups and is represented by the ISCC Board
- Daily operations are carried out by ISCC System GmbH, located in Cologne
- Various stakeholder committees guarantee active stakeholder dialogue
- The collaboration of all stakeholders and system users guarantees a continuous improvement of the standard
The ISCC Association promotes the sustainable production of biomass, circular materials and renewables

Tasks of the ISCC Association

- **Ongoing support** of stakeholders who share ISCC’s goals
- Establishment of **Regional and Technical Stakeholder Committees** for the discussion of topics with high practical relevance
- **Promotion of the ISCC certification system** for sustainable feedstocks
- Development and **continuous improvement of ISCC**
Regional and Technical Stakeholder Committee Meetings are an important part of the stakeholder dialogue and take place regularly.
