

COVID-19 challenges in the supply chain

Michael Chong
Senior Manager, Sustainability Asia
21.10.20

Extensive portfolio of globally-sourced sustainable raw materials

80%
waste and
residues
to 100%
by 2025

Animal fat from food industry waste

Fish fat from fish processing waste

Vegetable oil processing waste and residues (e.g. PFAD, PES, SBEO)

Used cooking oil

Technical corn oil

Palm oil

Rapeseed oil

Soybean oil

Camelina oil in projects only

Jatropha oil in projects only

Challenges in the supply chain

A hiker with a large backpack is standing on a rocky mountain peak. The hiker is wearing a green jacket, black pants, and green shoes. The background shows a vast mountain range under a bright blue sky with a sun flare. Three white circular callouts are overlaid on the image, containing text about supply chain challenges.

**Major impact
to the O&G
sector,
uncertainties**

**Inability to
engage with
suppliers &
stakeholders
like before**

**Difficult to
assess on-site
/plantations,
projects
delayed**

Going Virtual

- Supplier sustainability webinars
- Supplier meetings & government engagements
- Online/video audits
- Internal discussions/coffee breaks /catch ups
- Back to office in phases, but working offsite highly recommended

Neste Sustainability Webinars 2020 - Webinar Session 1: Traceability To Plantation Risk Calibrated Approach

Organizer: Ying Xuen Hoe | Presenter: Ying Xuen Hoe

Audio: Use your microphone and speakers (VoIP) or call in using your telephone.
