How to handle questions

Related to **content**
of the webinar

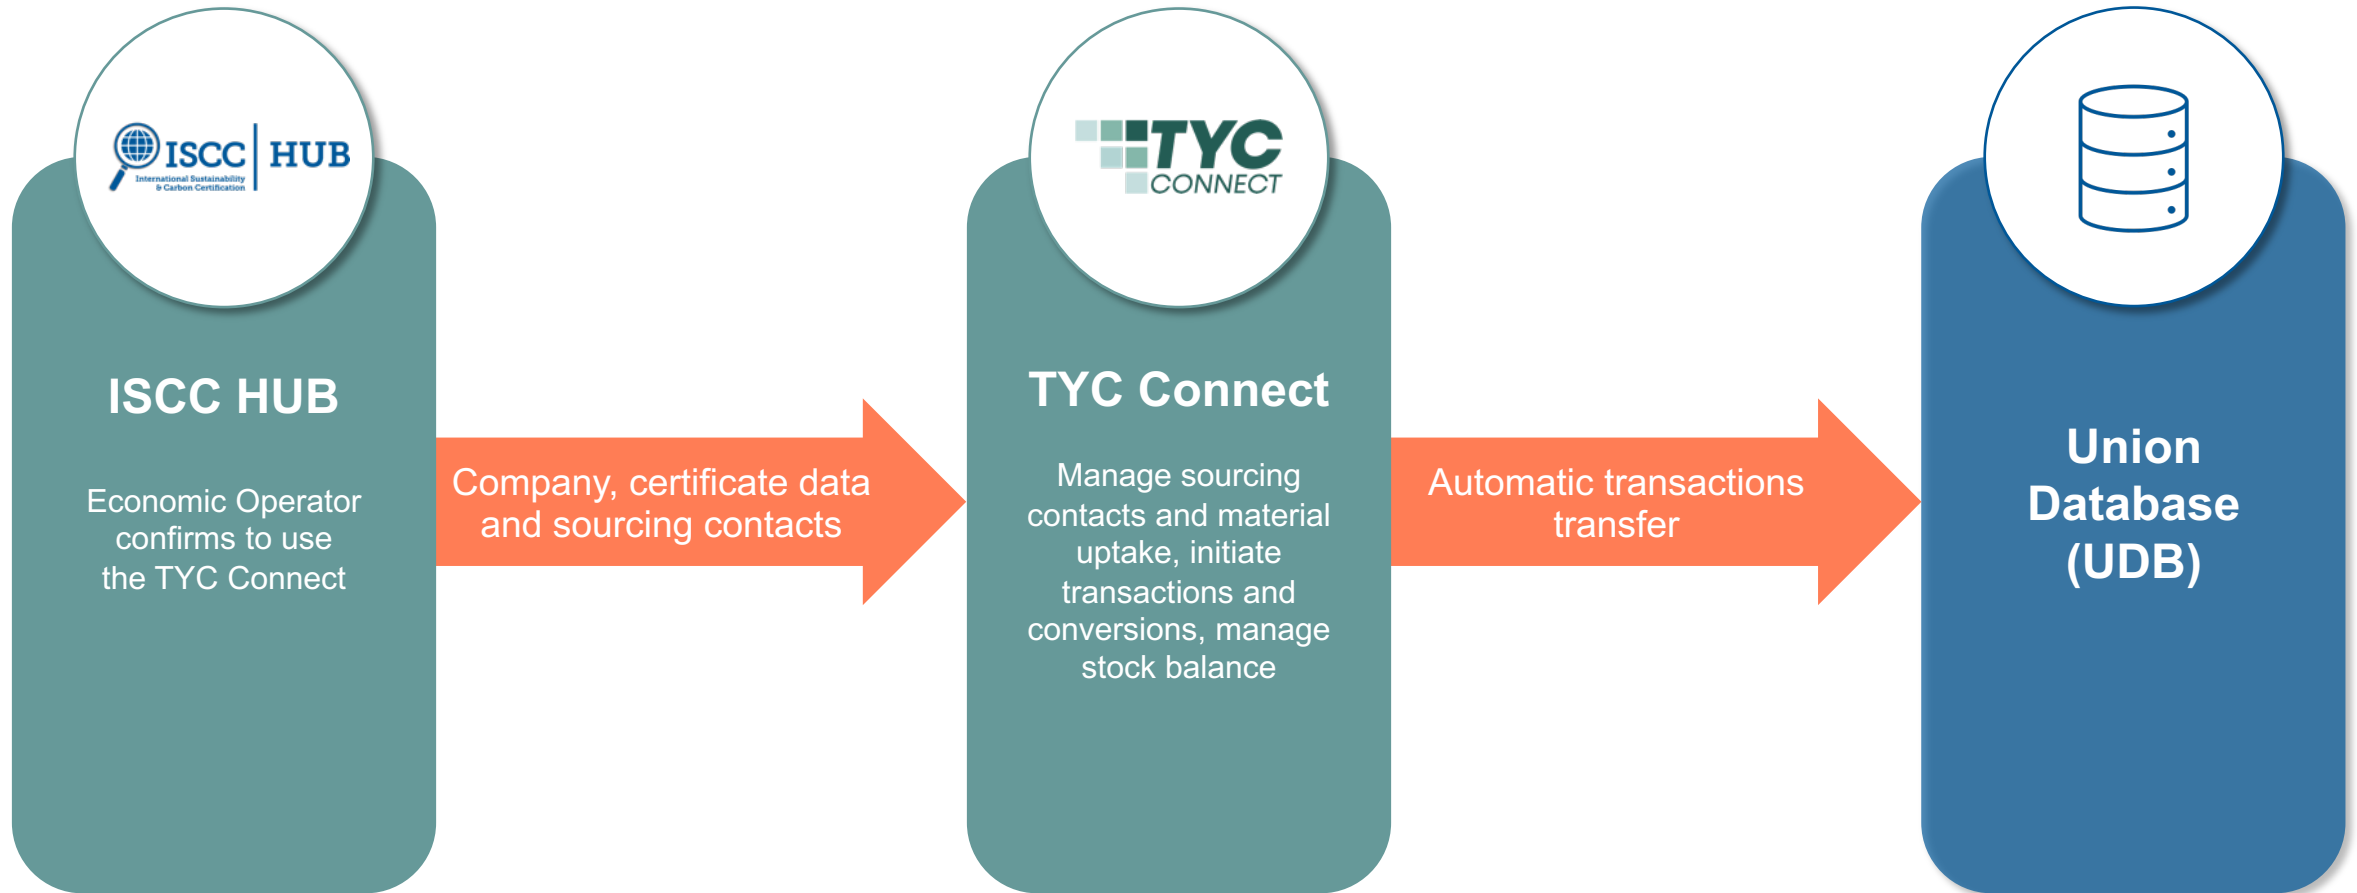

Related to **technical**
issues

- Scan the **QR code** available in the **Zoom chat** and log in with your full name and email address.
- Start sending your questions. You will be able to see the questions and upvote the ones you find most relevant.
- Questions will be displayed on the presentation screen for **the audience** during the demonstration.
- The participants who have posted the selected questions **will be unmuted**, allowing for direct engagement.

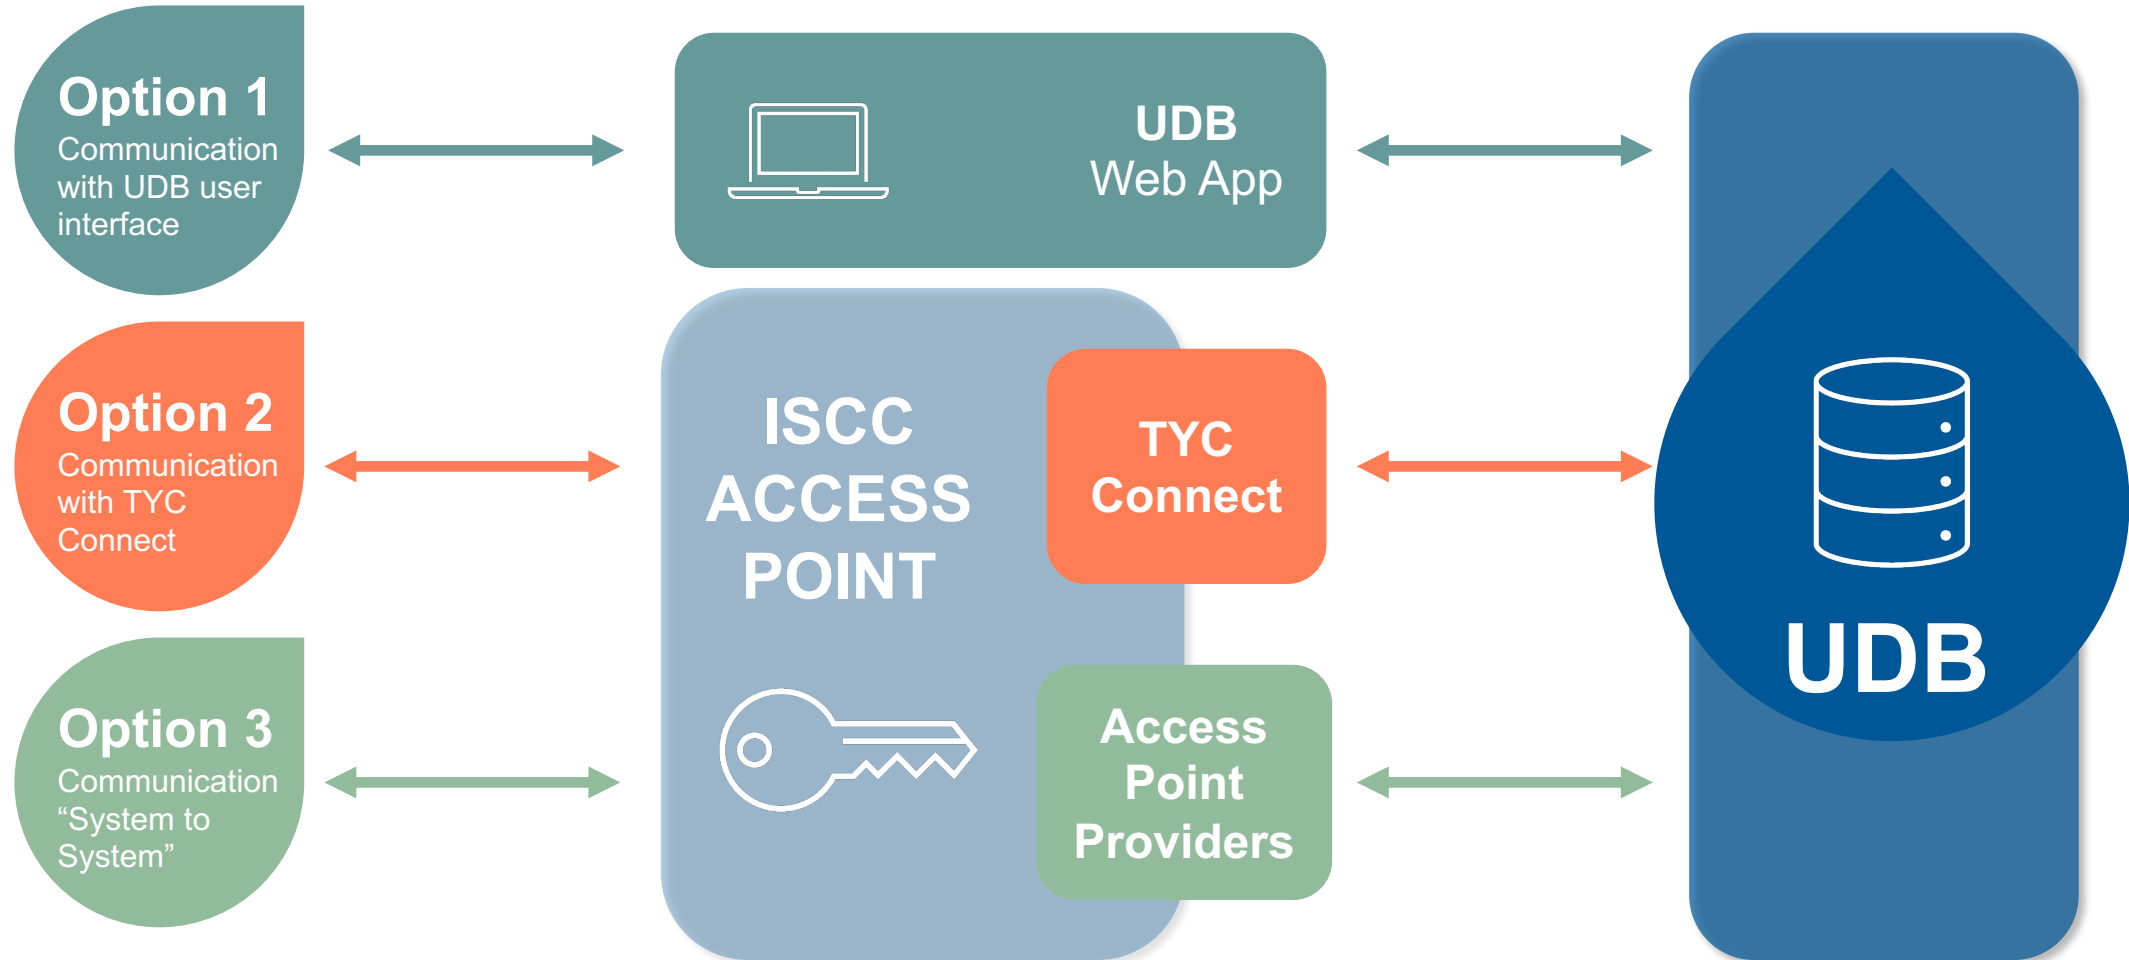

Overview of TYC Connect

- “One click” onboarding - automatic transfer of company and certificate data from the ISCC HUB
- Seamless upload of initial stock registration, sourcing contacts, material uptake and transactions via csv file
- Integration with ERP systems via API
- Integration with ISCC Mobile App: effortless synchronisation of sourcing contacts (points of origin) and material flow
- Mass balance: inbound, outbound, mass balance and stock reporting
- ISCC EU and ISCC PLUS certificates covered
- First pilot covering a supply chain from points of origin to biofuel production is undergoing, and second pilot is in preparation

Systems synchronization for effortless data flow

Three Options for EOs to Provide Transaction Data
