

List of material eligible for ISCC Canada CFR certification

(01 December 2025)

About this material list

The Canadian Clean Fuel Regulation (CFR) aims to reduce the carbon intensity of fuels supplied in Canada by promoting the production and use of lower-carbon alternatives. Agricultural and forest biomass play a central role in this transition, providing sustainable feedstocks for the generation of low carbon intensity fuels. To qualify under the CFR, these feedstocks must meet specific sustainability requirements, referred to as the Land Use and Biodiversity (LUB) criteria of the CFR.

ISCC Canada CFR has been recognised by Environment and Climate Change Canada (ECCC) as an eligible certification system to demonstrate compliance with the LUB criteria under the CFR. The following ISCC Canada CFR material list outlines the agricultural and forest biomass types that may be certified under this framework, supporting consistent implementation and providing clear guidance for all stakeholders.

All agricultural and forest feedstock materials that can be covered under ISCC PLUS may also be covered under ISCC Canada CFR. It is mandatory to use the wording from the ISCC Canada CFR or ISCC PLUS material lists on ISCC certificates.

Adding new materials to this list

ISCC may add materials to the list upon written request by the certification body prior to the audit. Please contact via the [ISCC webform](#).

List of material eligible for ISCC Canada CFR certification

(01 December 2025)

Declaration of material on ISCC Canada CFR
Aflatoxin contaminated corn
Barley
Bengkuang seeds
Brassica carinata
Camelina
Canola
Cassava
Castor seed
Coconut
Corn / Maize
Corn grain
Cotton
Cotton seed
Flax / Linseed
Forest biomass
Giant grass (Pennisetum)
Giant reed (Arundo donax)
Grass
Grass fibre residues from the production of grass protein
Hevea seed
Jatropha
Linseed / Flaxseed
Mustard / Carinata
Natural rubber
Nicotiana tabacum L. cv. Solaris
Non-Standard Coconuts
Oat
Oil Palm Fresh Fruit Bunches (FFBs)
Palm trunks

List of material eligible for ISCC Canada CFR certification
(01 December 2025)

Declaration of material on ISCC Canada CFR
Pelemir seed
Pongamia seed
Potatoes
Rapeseed
Rice
Rye
Shea nuts
Safflower / Carthame seed
Sorghum
Soybean
Sugar beet
Sugar cane
Sugar cane stems and leaves
Sunflower
Switchgrass
Tiger nuts / Chuffa
Timber
Triticale
Wheat
